Guide to Potty Training

When to let your puppy out?

1. After eating
2. After drinking
3. After sleeping
4. After they've been in their crate
5. When they sniff the floor

What not to do?

1. Leave them unattended
2. Reprimand or shout at them for an accident
3. Give them too much room in your house
(It is best to keep them in a small area when they are potty training)

What to do?

1. Use a consistent phrase like "potty time"
2. Wait for them to completely finish
3. Give them lots of praise
4. Do not let them play; potty time is potty time

Things to Remember

1. Be consistent
2. Give lots of praise
3. Keep an eye out for cues
4. Keep them close by
5. Put them in their crate when you are not close by
