

Cream Puff

Labradoodles

Recommended Vaccination Schedule

Before 9 Weeks

- First and second combination vaccine/ DHPP** without leptospirosis (your puppy will receive these before going home with you)

9-12 Weeks

- Third combination vaccine/ DHPP**

12-16 Weeks

- Rabies (based on local or state laws)
- Your vet may require a fourth combination vaccine/ DHPP**

To inquire about

- Bordetella
- Canine influenza
- Where there is a concern: Lyme

For your puppy to attend doggy daycare, grooming, or group training you may need to present proof that they are up to date with their rabies and annual bordatella shots (which prevents kennel cough).
